

## What to do to get more points?

### Guidance applies to competition

#### "Mapowiczu, collect POI" - the first month

**1st** Competition "Mapowiczu, collect POI" is introduction to OpenStreetMap points public buildings and points of interest (POI) related to services, tourism, sport, recreation and historical buildings.

**2** When calculating the points are taken into account **two types of tags:**

a) **basic** tags:

- amenity: all except parking\_space
- shop: bicycle, sports, gift, outdoor
- leisure: all
- tourism: all
- historic: all
- Emergency: ambulance\_station
- highway: rest\_area
- place: village, hamlet, locality

b) **Additional** tags - all except basic and:

- Source: all
- note: all
- fixme: all
- addr: all except addr: housenumber (Ie for addr: housenumber can be obtained points)
- is\_in: all
- access: yes
- oneway: no
- amenity: parking\_space
- bicycle: yes
- Foot: yes

For each **primary** tag mapowicz receive **1 point**, for **an additional 0.5 percentage points**. To receive points for POI of tags **must apply some basic tag**.

Among the **examples of additional tags** can be include: addr: housenumber, name, opening\_hours, website, phone, cuisine, fee, access,

Due to the award of points for the two types of tags, there may be two styles of data collection - with emphasis on the quantity or quality.

*The image to the left marked the results of two example mapowiczów. In both score General is similar. First added a large number of basic tags, the second added more facilities introducing more additional tags.*

The best results will therefore collect a large amount of data and to describe them with plenty of tags more.

**3** In the first month of the points are calculated only for **newly introduced objects**. We do not count points for modifying objects on the OSM database.

Therefore a wet of tags, thus avoiding subsequent replenishment. We encourage you Also to improve the objects in the in the database.

**4** The organizer reserves the right to exclude of scoring the tag and the conversion of credits again. We are not able to accept all tags, which greatly change the score (Eg amenity = parking\_space).

Generally speaking - we want to avoid a situation of mass data entry, which can draw the for example, a primer. Competition promotes tourism and healthy lifestyle. Any changes in the score will tell on the web competition.

**5** Each stage of the competition scoring will continue one month. Algorithm for calculating points based external data containing editions mapowiczów at a time (the files are processed). File change may not include editing Polls the server several seconds before full time.

wheelchair, capacity, wikipedia, hiking, bicycle, sport.

Therefore, **it is not recommended to leave the** sending OSM data into the database **in the last hour** period month stage.

Probably there will be mapowicze who the introduction of data will wait until the end, to confuse opponents. "Action Hydrant" revealed the last hour can bring surprising changes in the rankings.
